Guidance for grant applicants interested in Arctic Grayling

We've identified potential Arctic Grayling projects eligible for an FWCP grant. Read our Arctic Grayling synthesis report and our monitoring framework. Find out what monitoring projects we're ready to fund, and then submit a fall 2017 grant application to undertake one of these projects. Learn more today.

Applying for a grant? Notice of Intent opens August 3, 2017

If you are applying for an FWCP grant in our Peace Region, you must submit a mandatory online Notice of Intent by early September - date TBD. This notice helps ensure local First Nations are fully aware of your proposed project, and gives us a chance to provide guidance to you while you are developing your grant application. So start thinking about your project idea soon, and review our Action Plans now.

If you've applied for an FWCP grant before, you can start your Notice of Intent on August 3, 2017. If this is the first time you've applied online for an FWCP grant, register online August 3, and then start your Notice of Intent.

Caribou pen helps endangered herd

Keeping endangered caribou calves in a secure maternity pen is helping sustain local herds in our Peace Region. Learn more about this project.

Update: mercury in fish investigation

Our comprehensive investigation to measure mercury concentrations in fish in the Williston and Dinosaur Reservoirs and tributaries started in 2016. A preliminary report (May 2017) and an overview of preliminary findings are now available. This study, together with other data, will provide updated information on mercury

levels in several fish species in the reservoirs and their tributaries.

Read our reports

We post and share all final project reports so the results and lessons learned are available to everyone. We're updating our library often as new reports are finalized. Contact us if you can't find what you're looking for.
