Presentation by Bill Hanlon

While hunting Dall sheep in the spectacularly wild Tatshenshini/Alsek Wilderness Park in 1999, Bill Hanlon & his two hunting partners discovered the preserved remains of an ancient hunter emerging from the ice on the edge of a glacier. Now, almost 20 years later, Bill tells the story of this life-changing discovery and the three subsequent expeditions back to the discovery site of **Kwāday Dān Ts'ínchi** or "**Long Ago Person Found**".
