December 2020

Meet our new program manager: Monique!

Monique Stevenson joined us on Monday, December 7, as our new FWCP program manager. She takes on the role of providing oversight and leadership into the management and operations of the FWCP, which delivers approximately \$10 million in annual fish and wildlife project funding across its Coastal, Columbia, and Peace regions. [Read more.](#)

Trevor Oussoren, who managed the program for the last six years, has taken on a new role with BC Hydro's Indigenous Relations department. The FWCP team welcomes Monique and thanks Trevor for effectively leading the FWCP and collaboratively advancing our objectives with our program partners.

Update: 34 grant applications for fish and wildlife projects

Our Coastal Region received 34 grant applications for fish and wildlife projects in 2021-2022. The applications are going through a three-stage review and our regional board will finalize funding decisions in early 2021.

Grant applications were received from First Nations, non-governmental organizations, consultants, and agencies. The total ask for FWCP funds is just over \$2.1 million. In 2020-2021, our Coastal Region board approved 28 projects for approximately \$1.7 million. Read our [F21 project list](#).

Projects we're funding now support Chinook, coho and other salmonids. [Read](#) the full project list. Photo: iStock

Restoration of sawmill site will benefit Chinook salmon

The restoration of a sawmill site along the Puntledge River got closer to becoming a reality with the recent announcement of provincial funding that will secure the purchase of the Kus-kus-sum conservation lands. The FWCP helped fund the purchase and develop the restoration plan, which includes the removal of 3.36 ha of concrete and metal cladding along the shoreline. Replanting, recontouring, and removing the cladding will improve habitat and increase survival rates for Chinook salmon at this site of cultural and environmental significance to the K'omoks First Nation.
